

**Fashion for the future: London students present sustainable designs**

<b>Notes &amp; Cues:</b>	<b>Article:</b> <p>The Royal College of Art is holding its annual fashion show, in which students in womenswear, menswear, knitwear, footwear, accessories and millinery unveil their creations.</p> <p>This year, the "All At Once" show looks at the fashion industry's impact on the environment at a time when many designer houses are seeking to improve their green credentials to appeal to increasingly environmentally conscious consumers.</p> <p>"Fashion and sustainability have to now be one. You have to be thinking in different ways, " student Andrew Bell told Reuters at a preview.</p> <p>Piero D'Angelo hopes fashionistas can one day grow their own garments with slime mould. The living organism is applied on pre-designed patterns, and can grow up to one centimetre (0.39 inch) per hour.</p> <p>At a time of growing public awareness of waste and its impact on the planet, Anna Sophie Goschin is studying digital design and 3D manufacturing, which she says could have "huge potential" in making fashion more sustainable.</p> <p>"We make a lot of garments with a categorised sizing system, " she said. "But with planning and designing digitally, we can simulate the garment before production in the 3D manner, working directly with the shape of the body."</p>
