Koko, the gorilla, famous for using sign language, dies at 46

Notes & Cues:	Article:
	Koko, the gorilla whose apparent aptitude for sign language endeared her
	to fans around the world, died in her sleep on Tuesday morning, according to
	the Gorilla Foundation, which oversaw her care. She was 46.
	Koko was born Hanabi-ko, Japanese for "Fireworks Child," on July 4,
	1971, at the San Francisco Zoo, according to the Gorilla Foundation. She
	became an instant celebrity in her youth thanks to an early facility with
	American Sign Language. That fame was bolstered over the years as Koko, a western lowland gorilla, charmed entertainers like Fred Rogers and Robin
	Williams as well as their audiences.
	In 2001, Koko met Robin Williams, building an instant rapport with the
	actor and comedian. Williams spoke fondly of the experience in interviews and
	even joked about their encounter in a standup routine. After he died in 2014,
	Koko was reportedly crestfallen.
	Koko's language skills earned her a spot on the cover of National
	Geographic in 1978 and 1985, and she was the subject of many documentaries.
	By the time of her death, Koko's vocabulary had ballooned to more than 2,
	000 words, according to the foundation.
	"Koko touched the lives of millions as an ambassador for all gorillas and an icon for interspecies communication and empathy," the Gorilla Foundation
	said in a statement. "She was beloved and will be deeply missed."
	build in a statement. She was selected and win so deeply imposed.
